Inspiration

# The world of bath design

Good modern design is to be found in a clear concept, a corresponding and consistent theme, precise execution and a commitment to an interior philosophy, and while this will inevitably produce an impressive and credible space it may not satisfy the inhabitant in every way. Few professional interior designers endorse different styles in every room of the house, but the opportunity to experiment with individuality comes with spaces private in nature. Bathrooms lend themselves to personalization due to the function they serve. A bathroom should be a place where an individual, alone and at rest, feels completely comfortable, content and calm, no matter what image the greater space endeavors to project.

In this book, you will discover products that have caught our attention as noteworthy and timeless pieces of bathroom design.

## Bath Furniture

For most homeowners, the primary bathroom has become their sanctuary – their personal space where they can relax and grab a moment all to themselves. If you're thinking about remodeling your bathroom (or even just making some minor changes), the bathroom vanity is one of the areas that can make a big difference – both for design and functionality. Several factors are weighed when selecting the perfect bath furniture for your sanctuary; material, finish, floating or freestanding, countertop and storage.

# Bath Vanities....

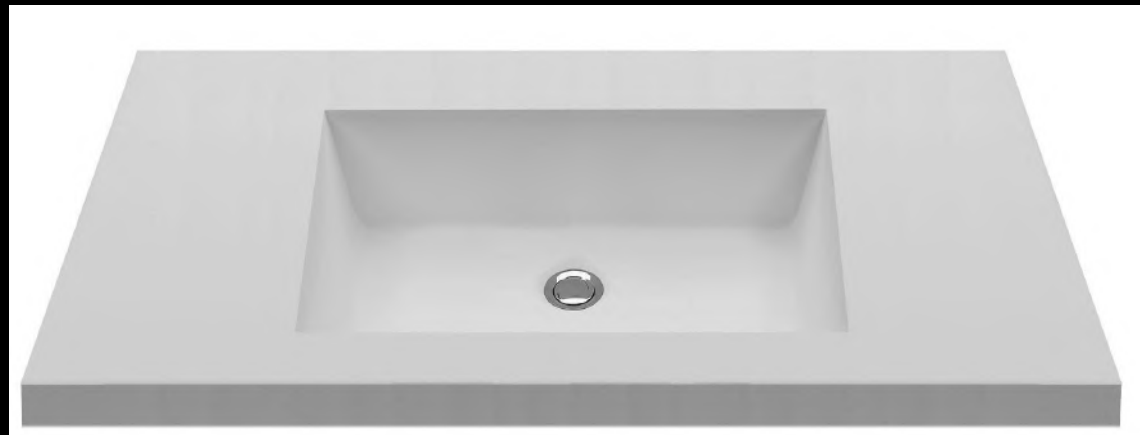

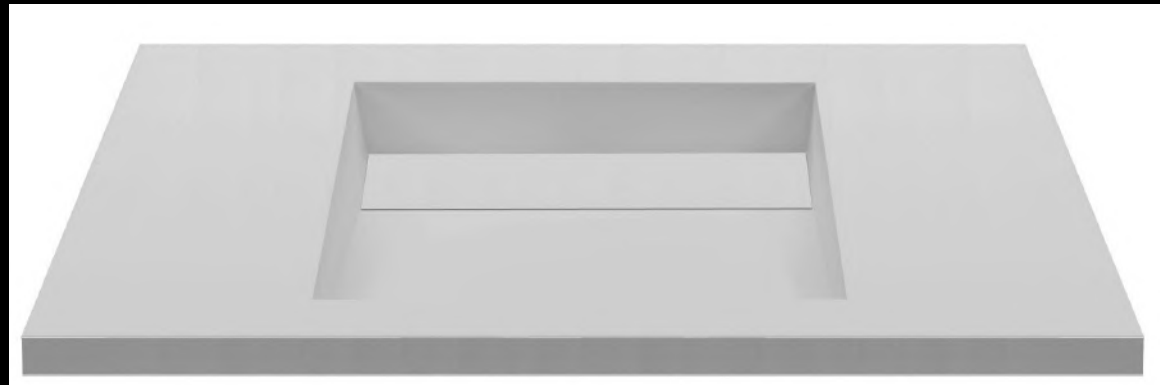

## Floating Vanities

A trend that first became very popular in restaurants is now becoming more prevalent in homes. One of the great things about these vanities is that the height can be adjusted. These give you more open space which can really come in handy if you have a small bathroom. Some of these are sleek and look like a stylish piece of artwork.

## Floating vs Freestanding

### Countertop Sinks:

Another way to customize your vanity is by the selection of your countertop sink. Many of our manufacturers have the option to choose a coordinating sink made of various materials such as porcelain, fire clay, solid surface, stainless steel, natural stone or concrete.

Some of our manufacturers also allow you the option to specify a center sink, or a right vs left-side sink or a sink with a set thickness. Having this type of customization allows you to have a vanity that truly fits your needs and space.

# Finding the perfect colors for every room

## Materials

When choosing a vanity, one must also consider the materials used in the production. At Lutz Bath & Kitchen, we fully support manufacturers that utilize green manufacturing practices that harvest woods from sustainable forests. We whole heartedly believe in protecting our environment for future generations to come.

We are also proud to support manufacturers that give you the ability to customize your furniture -- With dimensions to fit your space, doors and drawer finishes, and customizable hardware finishes.

## Bathroom Faucets

For all the ways you can customize your bath vanity, you have a plethora of options when it comes to choosing your bathroom or 'lavatory' faucets. They can be as minimalist or as intricate as you would like.

The lavatory faucet sets the tone for the entire bath, and it is a way for you to put your style on display!

Lavatory faucets also set the stage for all the other components of your bathroom. Once you have your style selected, it will be much easier to choose the other components that will be needed to achieve cohesiveness and a complete look for your bath.

# SHOWER SYSTEMS

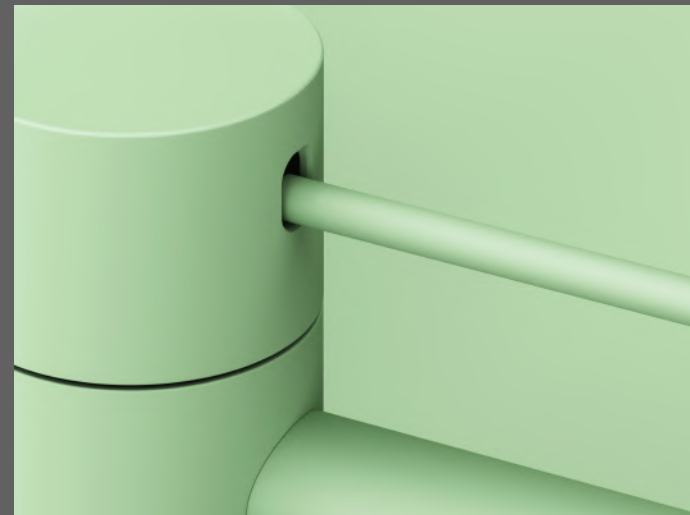

2020

# The Power of the Shower

Showers provide you with the wonderful opportunity to enhance one of the most used and important areas of the bathroom. Gone are the days of a mere showerhead above a basic bathtub. Today the possibilities are endless, from fold-down seats, steam generators, light therapy (aka chromatherapy), stereo speakers, scent therapy (aka aromatherapy), shelves and grab bars.

Showers are evolving from a place simply to bathe to a haven for relaxation where you can have a spa-like experience every day in your home!

## Steam Showers:

# An extraordinary Shower experience...

For thousands of years, Steam therapy has been used to promote physical well-being. A steam shower heats water until it vaporizes and then pumps the steam into an enclosed area for your enjoyment.

Steam offers dozens of benefits that range from physical to holistic wellness, which includes (but not limited to):  
Respiratory health, improved skincare, physical wellness.

Let Lutz Bath & Kitchen help you to create your ultimate at-home spa...Featuring steam systems by Effegibi and Mr. Steam.

I'm going to go take a hot shower. It's like a normal shower, but with me in it."

# WATER CLOSETS

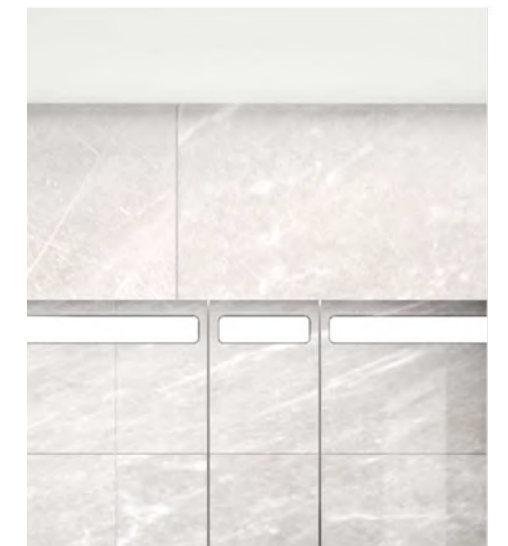

## A REVOLUTION IN TECHNOLOGY...

Water closets have come a long way since the first indoor water closet was designed in 1596. Today's 'intelligent' water closets can be 1 or 2 piece, and can be floor/wall mounted; they can have heated and/or illuminated seats, automatic lids, remote control operation, personal cleansing functions, and superior flushing systems.
